

Governance token

Where we describe a token (solDAO) that ACTIVATORS, CONTRIBUTORS, and VERFIERS|WITNESSES can earn in order to participate in the governance of SolidarityDAO.

Decaying

Tokens gradually lose their voting power through an adjustable decay rate, ensuring that only the people who are currently active can steer the future direction of SolidarityDAO. (i.e., 1-year-old token is worth 0.5 votes, freshly-minted token is worth 1 vote.)

Non-transferable

We don't want governance tokens to be bought but earned through participation.
