Homeless and undocumented people are excluded from the traditional financial system due to antiquated and inflexible regulations.

Daddy, I don't know how to walk,
but why is that man homeless?

Don't look down, just keep on walking...

Economic inequality and social polarization
are global problems that
governments alone cannot solve.

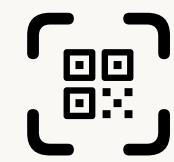

Know-Your-Neighbor

Prosocial incentive mechanisms can help coordinate all humans to build an inclusive society...

...where the holiest commandment is no longer Know-Your-Customer, but Know-Your-Neighbor.

Roadmap

**Community building and
inter-DAO networking**

**Pilot projects with
forward-thinking cities**

We believe that, through authentic conversations and transparent donations, we can reconnect ourselves with reality and liberate ourselves from poverty.

Once we achieve this, we can elevate ourselves towards long-term thinking, and we can transition from the logic of competition to the logic of collaboration.
